# **UPR 05**

Marking unit with marking head, 5000 Nm

Marking unit with 5000 Nm clamping moment specially designed for marking serial numbers on metal sheets. The integrated compensation allows to mark different metal sheet thickness (up to 2 mm) without further adjustments. High customisation rate thanks to the possibility to choose the marking position and the marking head type: number of characters, character height and depth.

- Marking head up to 7 characters
- Integrated compensation up to 2 mm
- Automatic or manual marking head available
- Possibility to orient the marking surface
- 73° opening angle
- Optical sensor
- Fully protected Internal mechanical system

#### CHARACTERISTICS

| Operating temperature        | 5° ÷ 45° C                                 |  |  |  |
|------------------------------|--|--|--|--|
| Min./Max. Operating pressure | 0,4 / 0,6 MPa                              |  |  |  |
| Opening angle                | 73°  |  |  |  |
| Cylinder bore Ø              | 100 mm                                     |  |  |  |
| Marking force (0,5 MPa)      | 80 mm (38,5 KN) 130 mm (27,5 KN)           |  |  |  |
| Moment (0,55 Mpa)            | 5000 Nm                                    |  |  |  |
| Weight                       | 80 mm <b>(71 Kg)</b> 130 mm <b>(77 Kg)</b> |  |  |  |
| Air cycle (0,5 MPa)          | 11,2 NI                                    |  |  |  |
| Pneumatic supply ports       | G1/2                                       |  |  |  |
| Sensor                       | electronic (optical)                       |  |  |  |
| Supply voltage               | 10 ÷ 30 Vdc                                |  |  |  |
| IP code                      | IP 65                                      |  |  |  |
|                              |  |  |  |  |
